

AESF Research Grant - G2429
Q3, 2022 Quarterly Report
PI: Brian P. Chaplin, University of Illinois at Chicago

Summary: We are in the no cost extension-year and we did not pause the research for an entire year during the initial COVID outbreak. Due to this situation and the fact that there was not a student available to work on the project this summer/fall, we do not have any significant progress to report this past quarter. A new student is still being recruited, and we will continue the research at that time.
